Whereas The ICFAI University, Tripura is interested in implementing onEdu Campus Management Software and has approached Winnou in this regard and Winnou Systems and Services (P) Limited has submitted a Proposal vide No: Winnou/ICFAI/onEdu/Proposal/171103 dt. November 03, 2017.

**Brief Introduction of User and Service Provider:**

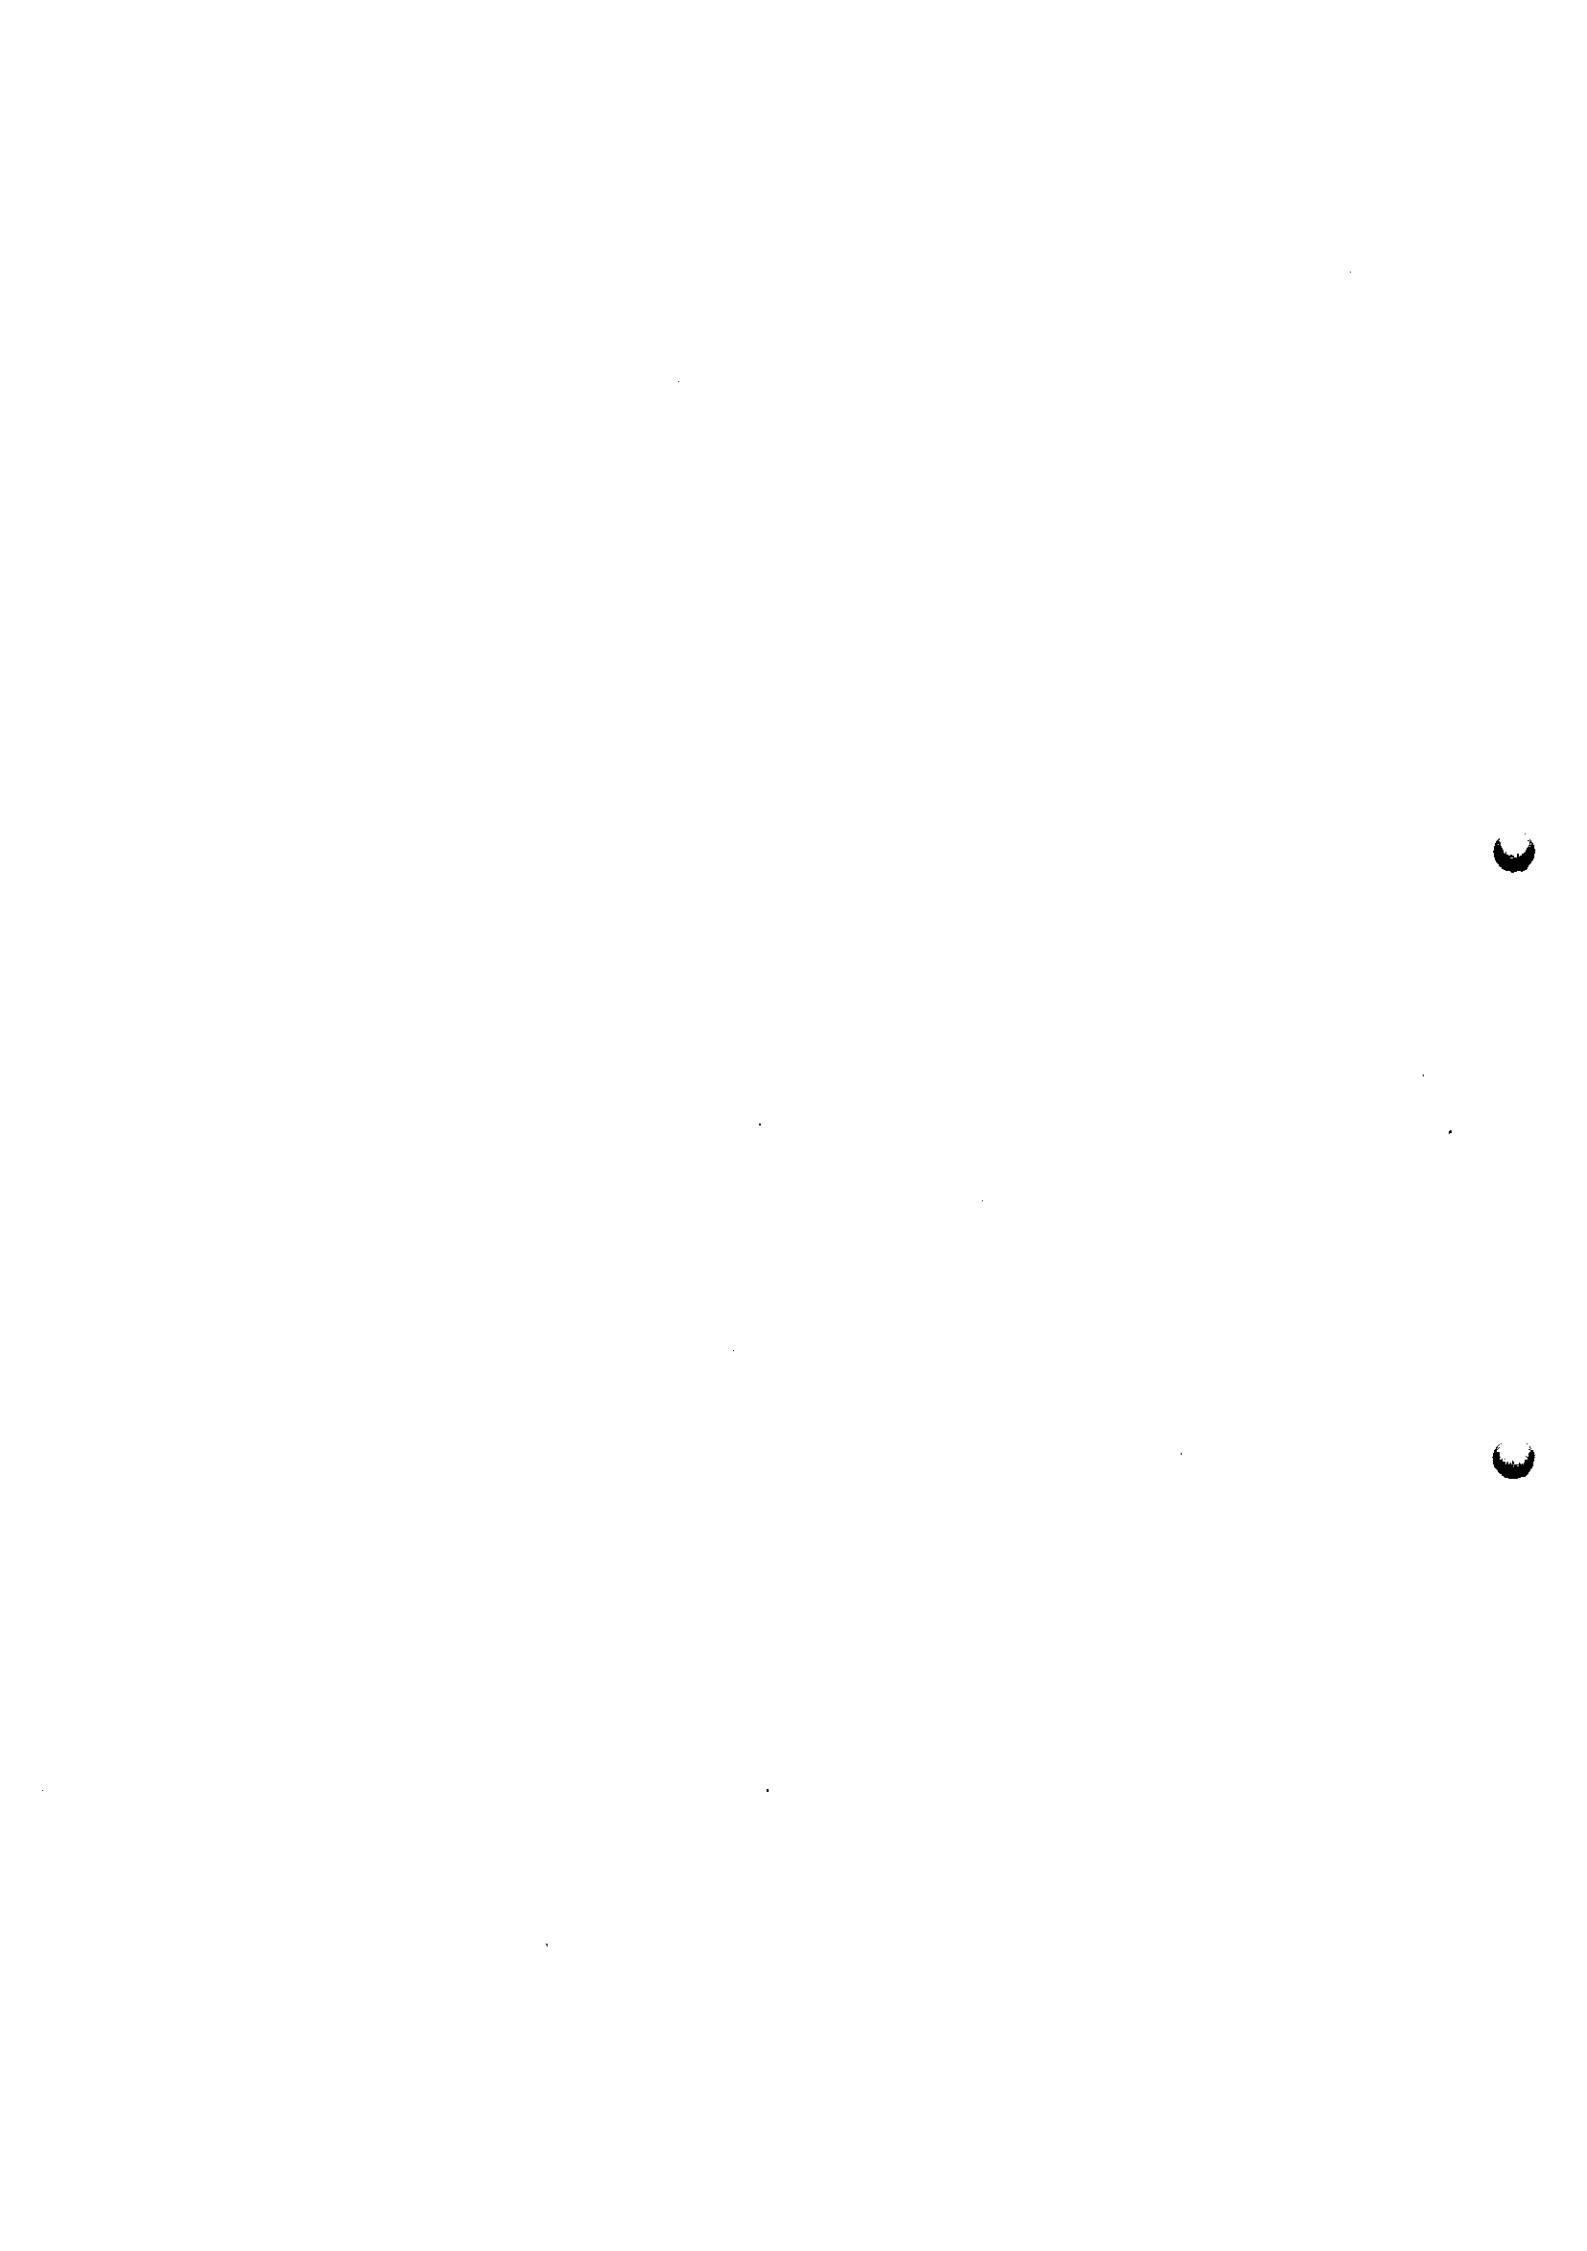

The ICFAI University, Tripura was established by ICFAI in 2004 under the provisions of The Institute of Chartered Financial Analysts of India University, Tripura Act of 2004. The University has a picturesque Campus at Kamalghat, West Tripura and it runs various high qualitative Science, Engineering, Management, Teacher Education, Legal Education and Physical Education programmes at affordable cost.

Registrar,  
ICFAI University Tripura  
Kamalghat, Tripura (West).

Winnou Systems and Services (P) Ltd (Winnou) was founded in year 2008 with a focus on providing open source and SaaS based software solutions to educational institutions. Its flagship product, onEdu, is a comprehensive Campus Management Solution that has been successfully implemented at more than 60 colleges across the country. The organization focuses on i) Leverage the open source software ii) Bridge the gap that the open source community leaves for end users iii) make the user interface as intuitive as hotmail, the first webmail that went viral and iv) Make our revenue from support rather than sale of software, essentially SaaS (Software as a Service) model.

While The ICFAI University, Tripura has expressed intention to implement onEdu at its Campus, Winnou has submitted a proposal which claims that:

1. The model works very well when the customer base is fragmented with many small players, most customers follow the same processes and in-house IT resources are limited at customer site. This is true of many higher educational institutes in India, and our approach of a one stop solution for both the software implementation as well as maintenance has been received well by our customers.
2. onEdu is a HySEA award winning comprehensive, simple-to-use, cost effective campus management solution that makes you perform better. OnEdu integrates RFID, Biometric and Wi-Fi technologies and works on cloud & mobile platforms.
3. Some of the best colleges and universities including OBIT (Hyderabad), UPES (Dehradun), Pearl Academy (Delhi) have already enhanced their performance and made their campus not only high performing one but also safe, secure and compliant.
4. onEdu is a cloud based, user evolved software to access and manage your campus data from anywhere in the world. With more than 60 colleges and 100,000 students records accessed every day, onEdu is one of the most widely used campus management solutions in India.
5. In addition to the best operational characteristics of reliability, flexibility, scalability and security, onEdu has many functional features to address the needs of various departments within a campus covering the entire life cycle of the student and many of the support processes including the following:

26	Placement

6. It promises a world class product with unparalleled customer service and support. In the SaaS model of software deployment, it is in our interest to ensure software is in regular use by our customers.

7. Unlike many campus management software companies who sell and vanish, we work on SaaS model - meaning we are there throughout our engagement, making sure that the onEdus really working 24x7 and you are able to improve your performance. onEdu is hosted on world's best cloud - the Amazon AWS Cloud without a single incidence of downtime for last 4 years. Data is backed up every day into a secure offsite location.

8. Winrou does not add expensive hardware or claim one time license fee. There is no capital expense on onEdu, onEdu works on Software as a Service (SaaS) model. You pay as you use. If not satisfied you can stop the service at any time - no questions asked! Our monthly subscription cost is much lower than anything you would spend on maintaining the software yourself. We share the costs of maintenance and product development across many customers, to make it an attractive cost proposition for our customers.

### 9. Solution for ICFAI

Many of the features of onEdu can be readily used at ICFAI, some have to be customized to meet the needs of ICFAI and a few features have to be built specifically for ICFAI. A phased implementation model will be followed keeping in view the available features as well as the priority of requirements of ICFAI. The complete solution can be divided into two distinct phases:

- I Implementation
- II Maintenance and Enhancements

10. **Implementation Phase:** Upon initiation of the project, Winrou will deploy staff to install, run and make the software functional for ICFAI. This phase will have four distinct activities.

11. **Implementation of onEdu software:** onEdu is a proven product that can be implemented at a short notice. However, there are dependent activities that need to be completed before the solution can be live. They are:

- Data conversion of all master data including student/faculty records and timetables
- Pilot run of the system to check for system integration and readiness for live activity

12. **Data Conversion:** University data shall be collected in excel / access templates and uploaded into the software to make it functional and ready for use. This data includes programs, departments, subjects, students, faculty, fee, scholarship, library and other master data necessary for the system to function. It is expected that the above steps shall take approximately 4 (four) calendar weeks to complete.

*[Signature]*  
Authorized Signatory

*[Signature]*  
Registrar,  
ICFAI University Tripura  
Kamalghat, Tripura (West)

13. **End user training:** End users shall be grouped into roles such as data entry clerks, faculty, admin staff, management and role based training shall be given to them. This is expected to take about 3 to 4 days. Student and Parent interfaces are quite simple and easy to use. There are video tutorials for every functionality available on our youtube channel at <http://www.voinaba.com/education>

14. **Go Live Event:** A launch event will be organised where in all the stakeholders will be invited and apprised of the benefits of the new system. Logins to the software will be shared with individual users by SMS. Users will also be able to download the mobile application from the Android and iPhone app stores and login with their smart phones.

15. **Maintenance and Enhancements:** It is estimated that about 50% of the cost of ownership of a software solution goes into maintenance and enhancements beyond the procurement and implementation costs. Software management cannot just address the business processes as they exist as a snapshot at a particular point of time. It is imperative that automation software such as onEdu be tailored as necessary to adjust to the changing business processes within the organization. We also understand that ICFAI being an institution that is continuously evolving to achieve its vision & mission goals, its internal processes will be subject to change as it evolves over a period of time. The activities in this phase can be broadly categorized into the following:

1. Corrective Maintenance
2. Perfective Maintenance
3. Preventive Maintenance
4. Enhancements

16. **Corrective Maintenance:** Corrective maintenance includes handling problems resulting from faults. Incidences of faults can be communicated to Winnow through Mantle, an open source based online support request tracker. Issues not handled satisfactorily can be escalated to relationship executive and further to the relationship manager in charge of your account at Winnow.

*J. Raju*  
FOCUS ON SYSTEMS AND SERVICES EXCELLENCE

Registrar,  
ICFAI University Tripura  
Kamalghat, Tripura (West)

*O. R. H.*  
Registrar,  
ICFAI University Tripura  
Kamalghat, Tripura (West)

17. **Perfective Maintenance:** Perfective maintenance involves making changes to improve some aspect of the system, even when changes are not suggested by faults. Performance improvements and changes to improve the maintainability, stability and extensibility of the software fall under this category. Winnou will continuously strive to improve performance of the system as well as find ways to enhance the maintainability of the solution. This can be achieved by automating certain routine tasks to achieve a situation of managing by exception, where in exceptional situations are alerted to the support team automatically.

18. **Preventive Maintenance:** Preventive maintenance involves changing some aspect of the system to prevent Pro-active checks to ensure security, reliability and redundancy of the system are part of this activity. Regular, pro-active checks to ensure that system is working well within the normal working conditions (CPU utilization, available hard drive space, database sizing etc.) These checks will include all failure points for the system. Winnou has a standard list of check points for each of our customer implementations for daily, weekly, monthly and quarterly time periods.

19. **Enhancements:** Some software enhancement requests originate from either updates to the existing business processes or introduction of new processes into the scope of the software by customers. Such enhancements will be analyzed and a cost and schedule impact report is submitted to ICFAI for approval before including that in the development cycle. However, there are many other regular enhancements that we continue to develop on a regular basis based on customer requests and such enhancements shall be made available to ICFAI for use at no extra charge.

20. **Database Access:** Read only access to the database will be provided to ICFAI University, Tripura. ICFAI can run the SQL's as needed to extract the data.

21. **Project Governance and Processes:** A well defined project governance structure and process helps in quicker decision making and ensuring that all appropriate stakeholders are informed of the project progress. Winnou recommends setting up a Program Management Office (PMO) comprised of at least the following four roles:

- 1. Executive sponsor of the project (ICFAI)
- 2. Project Manager from Winnou
- 3. Business Analyst (BA) of Winnou
- 4. Project coordinator at ICFAI

PMO is the highest decision making body of the project and shall meet once in a quarter to review the progress and set direction as necessary.

ICFAI University Tripura  
Kamalghat, Tripura (West)

  
For WINNOU SYSTEMS Now ...

Authorized Signatory

  
Registrar,  
ICFAI University Tripura  
Kamalghat, Tripura (West).

22. **Communication Process:** Communication is one of the most critical aspects that contributes to project's success. The following scheduled communication shall happen during implementation phase at intervals specified. Tools to be used include emails, minutes of meeting notes, skype or zoom for video conference calls, screen sharing discussions, and physical meetings.

S/N	Type of communication	Interval
1	Project Status Update	Weekly, by BA of Winnou
2	Program Management Office Meet	Monthly, by PM of Winnou
3	Requirements detailing meetings with key stakeholders at ICFAI	Conducted in the recon interviews stage.

23. **Change Management Process:** Changes to the software scope introduce a level of complexity that is difficult to handle. The later in the project phases that a change is identified, the higher the complexity in accommodating it. For the purpose of this project, a Change Request (CR) shall be raised if and when a new activity that is not part of the proposed solution becomes a part of the scope of the project. A CR is typically effort, schedule and cost estimated and presented to ICFAI for approval before taking up for incorporation into the project scope.

24. ICFAI would ideally like to have a local server in addition to having it on the cloud. It is proposed to start the system on the cloud implementation for ICFAI University Tripura. This is expected to happen in the next 60 days on the day of implementation.

25. Winnou will provide fully customize app depicting the name of the University which will run android and IOS platform, this app will be having push notification feature.

26. **Issue Handling Process:** Issues and support requests are handled using Mantis, our online support request tracker. ICFAI University, Tripura will be given a login to Mantis and expected to log all support requests into Mantis. Mantis is monitored during office hours by the support team and they shall take up new requests as per the assigned priority. Support requests are categorized as:

1. Showstopper
2. High priority
3. Low priority

Showstopper defects are those that stop any institute from executing their daily business processes. These defects would also not have any workarounds outside the system. Such showstopper defects will be taken up on priority and worked around the clock till it is resolved or a workaround is found. All other defects will be taken up based on their assigned priority.

**Typical turnaround times for each type of support request**

Type of Support Request	Turnaround Time
Slowstopper	Less than 1 calendar day
High Priority	1-3 business days
Low Priority	Less than 5 business days

**ICFAI University, Tripura will provide**

While the implementation of the solution is the responsibility of Winnou, ICFAI University, Tripura has a major role to play during the implementation process. The following points list out the expectations from ICFAI.

1. A Program Management Office (PMO) to be established at ICFAI University, Tripura to plan, monitor and set priorities for the project team. The PMO should ideally consist of the executive sponsor of the project at ICFAI University, Tripura, Project Manager of Winnou and the project managers and coordinators from both organizations. PMO will meet once in a calendar month to review the progress, address any issues tabled in the meeting and set revised/renewed direction for the project team.
2. A single point of contact (SPOC) be appointed at ICFAI University, Tripura for Winnou project staff to interact on a daily basis. While it is not expected that this will be a full-time role for the entire duration of the project, there will be significant coordination that will be required to align the departments and their requirements with ICFAI University, Tripura. This SPOC should be able to understand the big picture, bring necessary resources and decision makers to a meeting table and help Winnou drive the initiative internally.
3. Once gaps in functionality are identified, Winnou will document the gaps as well as the proposed solution to the gaps in a document. It shall be shared with ICFAI stakeholders for review and approval. It is important that ICFAI stakeholders allocate time for this activity and ensure that any comments/suggestions or approval of the proposed solution be provided to Winnou in a timely manner. We expect this turnaround should not take more than 3 business days. In case more time is required, an extension may be requested and Winnou shall inform ICFAI University, Tripura of potential slippage in project schedule.
4. ICFAI University, Tripura has to make end users available for training and pilot testing. We understand that end users will have their regular operational activities and participating in the pilot is an additional responsibility. However, pilot stage is a time bound activity and as such it is important that ICFAI University, Tripura end users spend sufficient time to ensure that the application meets their requirements.

5. ICFAI University, Tripura is expected to provide necessary approvals leading to milestone payments or reasons for not approval of deliverables within a reasonable time, usually not more than three business days.

6. Deliverables: As part of this agreement, Winou will deliver the following to ICFAI University, Tripura during the implementation phase.

- i) A working on Edu instance with all the list of modules as detailed in Section 5, hosted on our cloud server.
- ii) User and Admin help video tutorials will be provided. In addition to the initial training of the admin role, Winou will enable quick access to help using WhatsApp

### 8 Pricing

The following table details the services offered and corresponding prices.

Item	Amount	Due Date
1 Software Implementation charges	Rs. 1,20,000	Along with signing of agreement.
2 Monthly subscription charges	Rs. 10 per student (if student strength is less than 2500, per month a minimum monthly charge of Rs. 25,000 will be charged).	
3 SMS Charges	Rs. 0.11 per SMS	Based on usage, billed monthly. Not changed, if college decides to integrate with their preferred SMS Vendor. An integration fee of 2-3 Days will be charged.

### Terms & Conditions

- I) Winnou will offer the solution to ICFAI once the signed agreement copy is received from ICFAI University, Tripura.
- II) Winnou will make every effort to ensure operations of ICFAI University, Tripura are not interrupted due to system mal-function. Despite the efforts, if there is any instance of interruption or damage, Winnou is not liable for damages arising from such a malfunction.
- III) ICFAI or any of its stakeholders (staff, faculty, and students) shall not wilfully try to hack or break into the software.
- IV) Subscription charge will be reviewed on annual basis.
- V) Travel and accommodation expenses shall be reimbursed to Winnou in case Winnou staff have to travel to Tripura for project implementation and training. Prior approval will be obtained from ICFAI Tripura for all such travel needs.
- VI) Taxes & Duties: The above price does not include taxes & duties. All taxes & duties as applicable will be extra.

### Customization Charges

Winnou works with our customers in developing enhancements to the software and follows a regular quarterly release cycle for upgrades. Customer requested customizations that enhance the product marketability, will be developed by Winnou without additional charges considering that as an investment into our product development. However, specific customizations requested by ICFAI that cannot be part of our general product features, will be charged as applicable. This decision to develop the customisations is at the sole discretion of Winnou management.

### 9. SMS Charges

Winnou partners with quality SMS gateway providers for integrated SMS services. We will be following TRAI regulation for sending out bulk SMS charges will be revised as and when market situation changes. All applicable taxes will be charged extra as per norms.

10. Payment of recurring monthly bill will be made within 10(ten) days from the date of receipt of invoice.

### 11. Cancellation Provisions

ICFAI and Winnou can chose to cancel the contract at any time, with an advance notice period of at least one month. ICFAI shall reimburse all expenses incurred by Winnou up until the date of cancellation (including the one month notice period) on this engagement. Winnou will promise to provide all the data of ICFAI in formats that are readable and reusable by ICFAI for continuing their business operations.

**12. Protection for ICFAI**

Once implemented, enEdu becomes the backbone and nervous system of ICFAI University, Tripura within a short time frame. A common concern among our potential customers is how to protect their institution in case on an unlikely event where in Winnou is not in a position to continue their business.

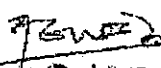

We have been in business since 2006, and are continuing to grow at a healthy rate of 40% year on year even today. However, if a situation does come up in future where in Winnou closes its operations, we promise to delivier the original source code to ICFAI University, Tripura along with its dalabase. The software can be installed on any Linux server and ICFAI can continue to run its operations as usual.

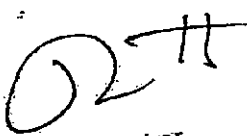

**10. Agreement**

By signing below, we state that we are the authorized signatories for our organizations. We have also read the contents and agreed with the deliverables, services, pricing, terms and conditions. As mentioned above.

# Student Registration Details

The screenshot shows the 'onEdu' portal interface. At the top, there are navigation links: Home, Calendar, My Profile, Student Info, and Log Out. Below this is a navigation bar with links for Admissions, Academics, Registration, Search Records, and Links. The main content area is titled 'You are here: Academics » Course Registration'. Underneath, there is a 'Search Criteria' section with four dropdown menus: Department, Program, Section, and Search Year. The Department dropdown is open, showing options: FE, FMS, and FST. A thought bubble with the text 'Select Required Department' is positioned over the Department dropdown. At the bottom of the page, there is a footer that says 'Sponsored by wipro.com'.

This screenshot is similar to the one above, showing the 'onEdu' portal. The 'Search Criteria' section has the same four dropdown menus. In this instance, the Program dropdown menu is open, displaying a list of programs: B Ed, MA Education, MEd, BEd, BBA, and MCA. A thought bubble with the text 'Select Program' is positioned over the Program dropdown. The footer 'Sponsored by wipro.com' is also visible at the bottom.

## Student Registration Details

The screenshot shows the 'Academics > Course Registration' page. Under the 'Search Criteria' section, there are four dropdown menus: Department (FE), Program (B.Ed), Semester (B.Ed 2nd Year Sem I (2017)), and Batch Year (2017-2018). A 'SEARCH' button is located below these fields. A callout bubble with the text 'Click on search' points to the button.

The screenshot shows the 'Academics > Course Registration' page with search results. A table lists student details including Roll No., Name, Program, Semester, Batch Year, Status, and Action. A callout bubble with the text 'Select the respective student and click on register' points to the 'Register' button in the 'Action' column of the first row.
