

The Department of Special Education & Rehabilitation and the Department of Clinical Psychology, The ICFAI University jointly observed World Down Syndrome Day with great enthusiasm and purpose, held on 20.03.2026.

Students took the lead in organizing a vibrant awareness program featuring a range of engaging activities, including slogan writing, presentations, drama performances, and interactive quiz sessions. One of the highlights of the event was the distribution of meaningful badges inspired by mismatched socks, symbolizing diversity and inclusion.

The program served as a powerful platform to spread awareness about Down Syndrome, encouraging understanding, acceptance, and respect within the community. Through these collective efforts, we aim to promote inclusivity and reach a wider audience with an important social message.
