

## Autism Awareness day From ICFAI University Department of Special Education - 2<sup>nd</sup> April 2020.

Every day is our day. In this situation, they all "WORK FROM HOME" too. From the ICFAI University Special Educational Lab, children continue their work and send them to us by a communication media.

They have already learnt to recycle the material, and this item is prepared by a waste material. Deeply spellbound by the message they have put: use paper bag as well as save the world from Corona virus.

It shows their sincerity on the individual basis. In that way we continue **Autism Awareness month of April 2020.**

PAPER BAG

Clay Plate painting

Paper Pasting

Card making by paper cutting

Craft work by Paper
