

Publication policy

IUT Journal aspires to select research paper, through highest quality peer review process. To achieve this, the entire peer review and publication process have been made thorough, objective and fair, for we believe that the reputation of the journal depends on the trust of readers, authors, researchers, reviewers, editors, research subjects, funding agencies, and administrators of public health policy. This trust is enhanced by describing as explicitly as possible the journal's policies to ensure the ethical treatment of all participants in the publication process. We have the following Publications Policies.

Copyright Policy

Copyrights for articles are retained by the authors, with first publication rights granted to the journal/publisher. Authors have rights to reuse, republish, archive, and distribute their own articles in the form of an abstract or as part of a published lecture or academic thesis after publication. The journal/publisher is not responsible for subsequent uses of the work.

Open-access Policy

We follow the Gold Open Access way in journal publishing. This means that our journals provide immediate open access for readers to all articles on the official website of the IUT-JARD. The readers, therefore, are allowed to read, download, copy, distribute, print, search, link to the full texts or use them for any other lawful purpose. All articles published are open-access articles distributed under the terms and conditions of the Creative Commons Attribution license.

Submission Policy

Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis), that is, it is not under consideration for publication elsewhere.

Publication Charges

Despite being a multidisciplinary Journal, IUT-JARD is determined to publish decent research papers, through highest quality peer review process, without any publication fee.
