▶ Project Description:

Oil and gas industry is one of the biggest sector in the world. Upstream, midstream & downstream are the three key areas of this. There are number of problems occurs, in order to perform fishing on a well, drilling must be shelved & special fishing tools employed. Each tool is specially crafted to perform a specific function or retrieve a certain type of fish. There are two options to recover lost pipe. First is a spear which fits within the pipe and then grips the pipe from the inside. Second is an overshoot maybe employed & this tool surrounds the pipe and grips it from outside to carry it up the wellbore.
